

Personal Protective Wear

Use of these items helps to protect yourself and anyone you come into contact with. This is an important part of transmission-based precautions and can save lives when there is a possible coronavirus case in your facility.

Face Masks

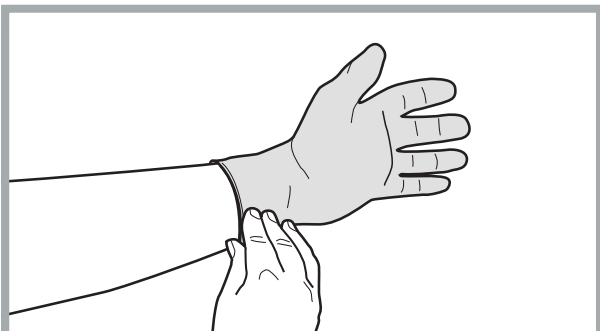

Use face masks when taking care of a person with a suspected coronavirus infection. Cover your mouth and nose with mask and make sure there are no gaps between your face and the mask.

Eye Protection

Use eye protection if there is a chance of airborne or droplet infections when in contact with a suspected coronavirus patient.

Gloves

Use gloves when taking care of vulnerable patients to help prevent the transmission of coronavirus. Avoid touching tips of gloves when donning and removing, to limit contamination.

Gowns/Suits

Use gowns or suits when providing direct care or coming into contact with coronavirus patients.
