

COVID-19 Supply Checklist

Every facility should have these items available as part of their COVID-19 Preparedness Response. They follow four lines of defence.

Surfaces.

- A TGA listed microbial sanitiser i.e. BIOSAN II, suitable for large surfaces
- A sanitiser such as Kwixsan suitable for sensitive electronic equipment
- Spray bottles and triggers – for each room/area
- Disposable Chux-style wipes

Hand Washing and Washroom.

- Signs promoting handwashing at every wash station
- Easy to use hand wash dispensers & spare cartridges
- Additional hand wash pumps, to provide back up supply
- Disposable hand towel or adequate hand drying systems
- Janitorial paper including toilet rolls + tissues
- Additional garbage bag supplies
- Washroom cleaner

Extra Protection.

- Signage promoting sanitising where hand washing is not available
- Sanitising cartridges for installed dispensers
- Mobile sanitiser stands for high traffic entry ways
- Portable sanitising pumps for high risk areas such as lounges
- 'Outbreak Kit' for use in case of an infected resident. Including Personal Protective Equipment such as gowns, overshoes, facemasks, gloves and goggles/face shields; soluble laundry bags for contaminated washing; and 'gown up' signage to instruct and inform staff.

Symptom Diagnosis.

- Signage promoting the reporting of any symptoms
- Infrared Thermometer Guns for symptomatic visitors or residents
- For large facilities, infrared thermal scanners are available for automatic symptom alerts upon entry
